

ISO 14001:2004 Internal Auditor Course

Course Objectives

This workshop aims to equip participants with the insight into the standard of the ISO 14001:2004. Knowing how to conform to the new standard will be the challenge and this workshop will be able to provide the adequate know-how. This course also aims to provide participants with the most updated legal and other requirements, which is a necessity of the standard. It will also seek to provide the participants on the methodology for periodically evaluating compliance with environmental legislation and regulations, to meet the commitment to compliance, which is an emphasis in the revised standard. The objective of this workshop is also to impart sufficient knowledge and information in internal EMS auditing processes and techniques.
