

ISO 22000:2005 Food Safety Management System– 3-day Documentation & Implementation Course

Course Objectives

ISO 22000:2005, **Food safety management systems – Requirements for any organization in the food chain**, provides a framework of internationally harmonized requirements for the global approach that is needed. The first auditable standard for the food industry developed within ISO by experts from the food industry, along with representatives of specialized international organizations.

ISO 22000 covers all organizations in the food chain from farmers to catering and defines the requirements for a food safety management system. ISO 22000 incorporates elements of ISO 9001, Pre-requisites Programmes (PRP), and HACCP.

At the end of this course, participants should have acquired:

- A clear understanding of the intent of the ISO 22000: 2005 requirements
- The ability to assess the company's existing system and identify its needs for further improvement
- The knowledge to establish the documentation system and prepare the various types of documents needed for the ISO 22000: 2005
- The knowledge in formulating steps to implement a Food Safety Management System to meet ISO 22000: 2005
