

ISO 22000:2005 Food Safety Management System – Internal Auditor Course

Course Objectives

Many organizations in the “food chain” have implemented a HACCP-based food safety system or the ISO 9001: 2000 to address food safety and quality issues.

The ISO 22000: 2005 incorporates ISO 9001, Prerequisite Programs (GAP/GMP) and HACCP, was published in September 2005. Many food-related businesses are now getting ready to understand how the ISO 22000 will affect them. They must be able to implement, change, integrate or enhance their existing management system to meet ISO 22000: 2005 requirements.

Internal audit of the FSMS is a requirement of the ISO 22000: 2005. There are special and different issues which need to be addressed in order to have an effective internal audit program of the FSMS as compared with ISO 9001 QMS or HACCP System.

At the end of this course, participants should be able to:

- identify and interpret the requirements of ISO22000: 2005
- understand and apply the fundamentals, steps and techniques for effective auditing of the FSMS to ISO 22000: 2005
- plan out the details for the conduct of an internal audit of the FSMS
- apply key points and practices in overcoming difficulties in auditing the FSMS to ISO 22000: 2005
