

ISO/IEC 27001 ISMS INFORMATION SECURITY MANAGEMENT SYSTEMS LEAD AUDITOR COURSE

PSB Singapore

Executive Summary

With a stunning adoption rate of 20 folds over the past 5 years, ISO/ IEC 27001 Information Security Management System (ISMS) is one of the most look-upon standards today. ISO/ IEC 27001, with normative references of ISO/ IEC 17799, sets out the requirements for a management system in information security and many ISMS certified companies have benefited from the standards.

Get access to the International Standard on Information Security Management today and be a certified ISMS lead auditor that will help distinguish you from the rest of the crowd.

Course Description

This 5 days Information Security Management System (ISMS) Lead Auditor training courses provide information security professionals with the knowledge and skills required to assess the conformance of an organization's information security management system to ISO/ IEC 27001:2005 (ISO 27001).

This course is accredited by International Register of Certified Auditors (IRCA) with the instruction, course content, course duration, examination and administration regulated by IRCA. Delegates should note that evening work is required during the course and there will be a two and half hour examination conducted on the final day of the course.

Benefits

Upon successful completion of the IRCA certified ISMS Lead Auditor course, the delegate:

- Will be equipped with knowledge and skills required to perform audits of Information Security Management Systems (ISMS) against the ISMS standards
- Will satisfy the training requirements for initial certification as an IRCA ISMS auditor. Please refer to <http://www.irca.org> for details on the requirements to all grades of ISMS auditors.
- Will be able to expand your auditing competency
- Will be able to increase their credibility through gaining international recognition
- Will be able to improve their resume and help to increase their earning potential

Course Content
