BUILDING MATERIALS

The Productivity & Standards Board (PSB) Product Listing Scheme has replaced the SCDF building material approval process.

Any material that is intended for fire safety works, if listed under the [PSB Product Listing Scheme](#) and its use is in compliance with the requirements stipulated in the Fire Code, would be deemed to be acceptable to SCDF, Fire Safety & Shelter Department (FSSD). No separate approval is needed. The said scheme took effect from 1 April 98.
